

Commission Brief

Project Title: AniMeter Mascot

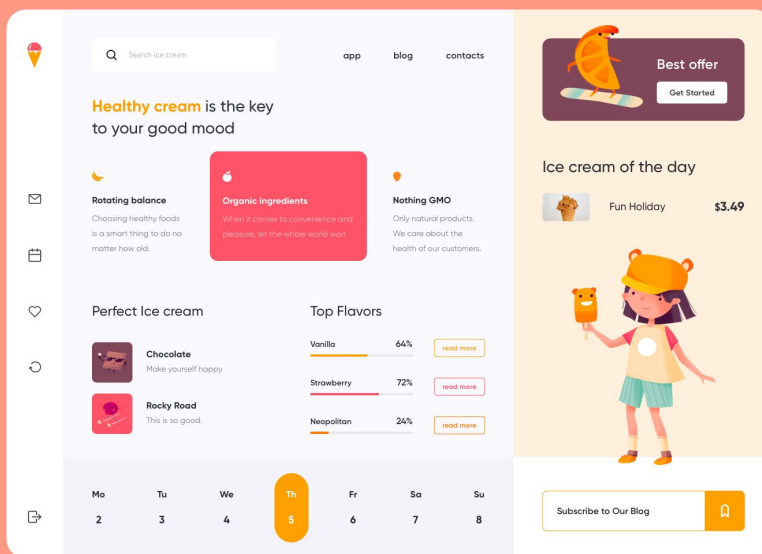

Twitter @JohnDinhCodes

3/22/2020

1. Project overview

We would like a mascot with a similar art style to crunchyroll's mascot 'Hime'.

We plan to have the mascot on our site's dashboard similar to how the following image below has their mascot layed out.

Commission Brief

We would ideally like a final product to be a png, or a .psd or similar software extension that can export the product as a png with a transparent background.

2. What is expected

We expect a full body drawing of a female character with clean line art. We believe Crunchyroll achieved this with a slight orange border around the entire character and would like the same thin border with our website colors, or whatever you feel makes it look best.

3. Character Specifications

We would like a female character with glasses, wearing a lab coat and holding a clipboard. Here is a style reference for what we are looking for as far as lab coat and clipboard.

As well as stated above, we would also like the character to have a bob cut with bangs hairstyle with our website colors. Light Blue: #11cdef

Commission Brief

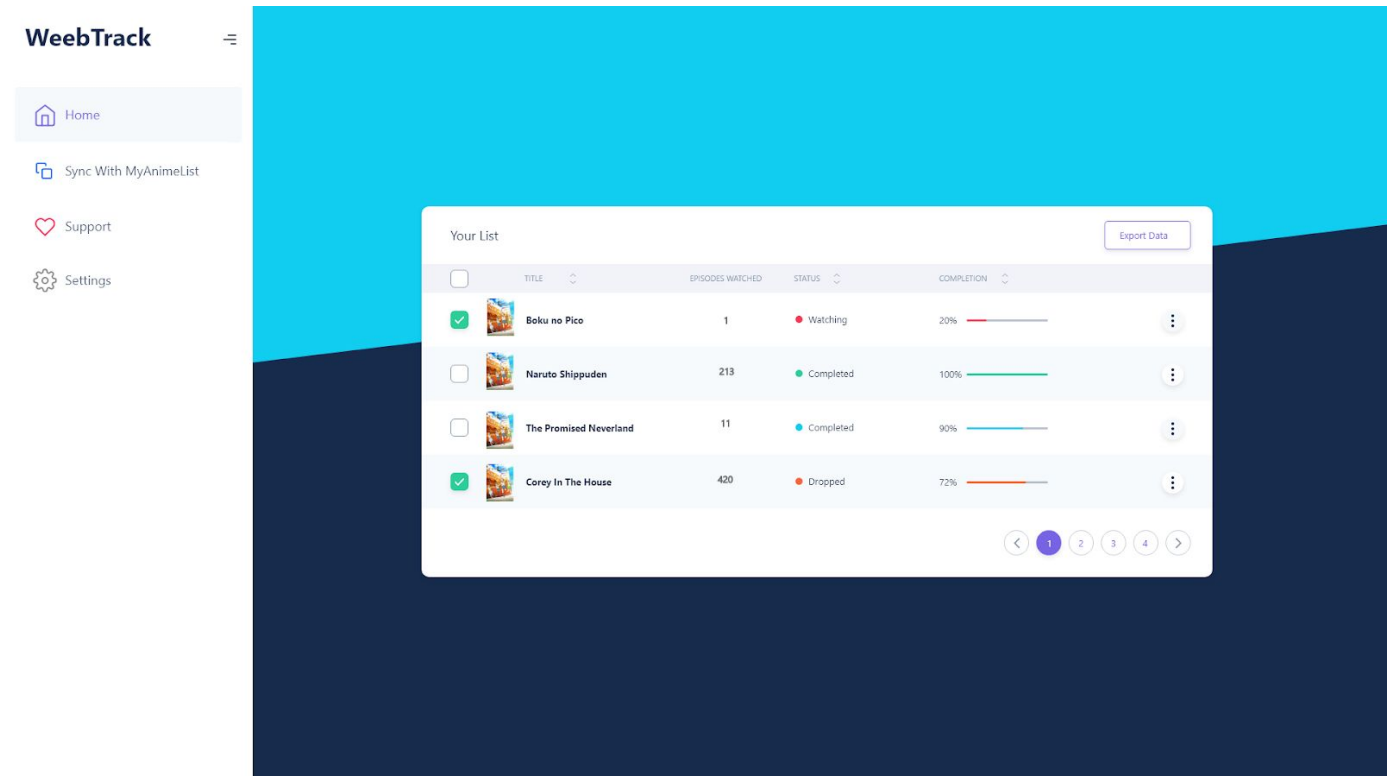

4. Our Website Colors

The two main site colors we have are the light and dark blue in our background. We are in the process of redesigning so your choice of colors is very flexible.

Light Blue: #11cdef

Dark Blue: #172b4d

5. Character Posture

Completely up to you on how dynamic or simple you want the posture to be. We just expect the character to look like it is directly facing you for a more personal connection feeling.

Commission Brief

8. Additional Information

We plan to have multiple commissions, however we are going to use this first one for a getting started or a tutorial for our software. That being said, we want you to have as much creative freedom as possible outside of the above guidelines. Feel free to change up the posture as much as you want, and the outfit underneath the lab coat as well.
